### VAMOOSE Peg Game

This is a simple project. Drilling the holes accurately is a little difficult without a drill press. The base is cut from 1/2" pine planking scrap. Print out the diagram and tape it to the 1/2" wood stock. Leave the diagram in place as a guide for cutting the base to the specified size.. Use the dimple marks to locate and drill each hole. These holes need to be big enough the golf tees stand well but do not stick (about 1/8" diameter). All you need is the template, 12 golf tees, 2 dice, a hand drill or drill press, one drill bit, one counter sink bit, one sheet of 150 grit sandpaper, and safety goggles.

#### Construction:

1. Tape the diagram to the precut 1/2" wood rectangle.
2. Use the diagram for placing the 12 holes.
3. Remove the diagram.
4. Drill about half way through the wood.
5. Use a counter sink bit to slightly bevel the top of each hole.
6. Sand all surfaces to a smooth finish.
7. Be sure to sand the sharp corners to a soft rounded shape.
10. Cut out the game directions and tape or glue them to the bottom.

VAMOOSE Peg Game Rules (2 players):

1. Place pegs into all the holes.
2. Roll the dice for a turn.
3. Remove pegs adding up to the number rolled.
4. Play continues until all pegs are gone.
5. Player with the FEWEST pegs wins!
