

Use a spiral blade to minimize turning the project.

1. Start with a piece of material about 15 1/2" long x 9 1/2" wide. For best results use 1/2" thick material.

2. To customize, add name or initials between Xs, or on body of roadster. Free Fonts are available at www.otbpatterns.com.

3. Drill 1/8" dia. hole at the eye, and nose. Drill holes at letters if using. Use the drill holes to insert scroll saw blade. Cut all inside cuts first then cut outside. Trim all cuts with razor knife and sand with 150 grit sandpaper.

4. Stain or paint as desired.

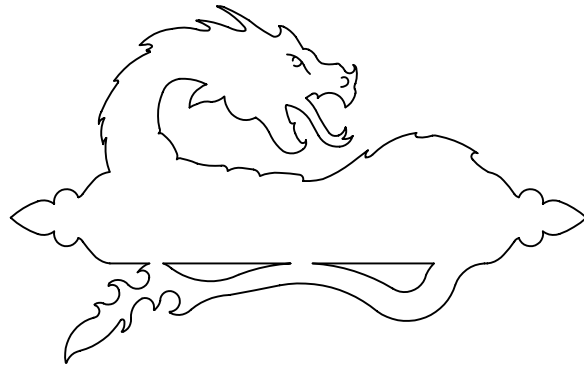

5. Drill and attach Shaker Pegs at places marked X. Attach two heavy duty plaque hangers to back.
